+8801919721621 Dhaka, Bangladesh [Tahmidul Islam Omi](#) [Tahmidul-Islam-Omi](#)

[tahmidulislamomi09@gmail.com](mailto:tahmidulislamomi09@gmail.com) [tahmidul-islam-omi.github.io](https://github.com/tahmidul-islam-omi)

 **Champion, National Skill Competition 2025 (Web Technologies)** – representing Bangladesh at **WorldSkills 2026**, Shanghai

## EDUCATION

**Bangladesh University of Engineering & Technology**

Nov 2022 – Expected June 2027

B.Sc. in Computer Science & Engineering

## EXPERIENCE

**Stealth EdTech Startup (Software Developer)**

Apr 2026 – Present

Building an AI-powered Socratic learning platform that helps students learn through interactive questioning, adaptive assessments, and personalized feedback.

**EduLytics (Software Developer Intern)**

Nov 2025 – Jan 2026

Built the speaking module of an AI-based IELTS platform, integrating the Gemini Live API for real-time speech-to-speech conversation practice. Also developed frontend features (Next.js, Tailwind CSS, TypeScript) and backend services (Express.js, MongoDB) for their academic management platform.

**SocioFi Technology (AI Intern)**

Apr 2025 – Oct 2025

Developed AI agent projects leveraging RAG, LangChain, and LLM integration to demonstrate applied AI skills.

## SKILLS

**Languages:** Java, Python, C, C++, JavaScript, Dart, TypeScript

**Frameworks & Libraries:** React, Next.js, Node.js, Express, FastAPI, Tailwind CSS, Material UI, Bootstrap

**Databases:** Oracle, PostgreSQL, MongoDB

**AI & ML:** RAG, LangChain, Agentic AI, Speech-to-Speech (Gemini Live, ElevenLabs), Pandas, NumPy, Scikit-learn, Matplotlib, PyTorch

**DevOps & Cloud:** Docker, AWS, CI/CD pipelines, GitHub Actions

**Tools & Utilities:** Git, GitHub, Prisma, Apache JMeter, Supabase, Puppeteer, Zod, Resend, Qdrant

## PROBLEM SOLVING

Solved 200+ problems on [LeetCode](#), NeetCode & Codeforces spanning Dynamic Programming, Graphs, Trees, Greedy, Shortest Path, Heaps, and core data structures (Arrays, Hashing, Stacks, Queues, BST).

## PROJECTS

- **C Compiler** | C++, ANTLR, Lex | [GitHub](#)

Built a C compiler from scratch across four stages: symbol table, lexical analysis, parsing (ANTLR4), and intermediate code generation with peephole optimization. Emits 8086 assembly runnable on an emulator; supports type casting, scoping, control statements, loops, recursion, and error detection.

- **DisasterLens** | React, FastAPI, MongoDB | [GitHub](#)

Built a disaster management platform for Bangladesh with real-time monitoring, volunteer coordination, emergency alerts, AI-based impact analysis, geospatial risk mapping, and bilingual support for authorities and communities.

- **EcoMealHub** | React, Express, Supabase | [GitHub](#)

Developed a full-stack web app (SDG-2 & SDG-12) to help users track food inventory, monitor expirations, plan meals, and reduce waste. Implemented authentication, OCR-based receipt scanning, rule-based tracking, dashboards, and data insights for responsible consumption.

- **Weather AI Agent** | React, FastAPI, Supabase, LangChain | [GitHub](#)

Developed a voice-and-text weather assistant handling natural language queries using LangChain, OpenWeatherMap API, and ElevenLabs. Implemented query understanding, weather data retrieval (current, historical, forecast), and voice responses. Integrated Gemini for intent recognition, with error handling, prompt tuning, query history (Supabase), and sentiment- and context-aware conversations.

- **Web Analytics & Dynamic Dashboard** | React, FastAPI, Supabase, Gemini LLM | [GitHub](#)

Built a web analytics platform for owners to track user activity, session metrics, and system details, with a lead scoring system. Added an LLM-powered dynamic dashboard alongside a static one, letting owners query any metric and get interactive visualizations.

- **BUET CSE Assignments** | [GitHub](#)

This repository contains all my academic assignments from BUET CSE, covering topics such as OOP, DSA, Design Patterns, OS, AI, Compiler, Signals & Linear Systems.

## ACHIEVEMENTS

- Finalist Team at Mapathon 2026
- Ranked Top 10 out of 170 teams at InnovateX Hackathon.
